

What is EHS to NISSI

# EHS - Environment, Health and Safety

## EHS to NISSI is

- Safety of the personnel.
- Safety to others who working around the personnel.
- Safe working environmental.

# What is Accidents?

- Careless incidents only become accidents.
- We do not believe in accidents.
- **Will to Nil** all careless incidents which leads to zero accidents.

# Beginning of EHS for NISSI personnel

- We started to follow safety principles from past three years.
- From Induction training itself, we make understand our new employees that “Safety procedures is not a separate work, it’s a part and beginning of our work”.
- Our EHS officers conduct following safety awareness training and exams .
  - Basic electrical safety awareness.
  - Workplace electrical safety awareness.
  - Supervisor electrical safety awareness.
- We organize First aid training and certification from St.John Ambulance (India) to our new employees.

- Our safety officers does audit and group discussion at site upon safety regularly.
- Medical fitness examination has done for each employees at reputed medical centres.

How EHS has been followed &  
executed at site

- We believe strongly that “improvement of safety at site, improves the progress of work.”
- Our site engineers/representatives conduct Tool Box meeting, Risk Assessment daily before starting the work.
- Capturing and recording regularly Near miss events, hazardous events, hazardous working area, LOTO.
- Our site engineers/representatives maintain and report Monthly safety register.
- Our EHS officers often review site safety reports, Tool box meeting, Near miss events and provide their valuable feedback.

TOOLBOX Meeting

Isolating Hazardous area

EHS at work place

- Our EHS officers visit site regularly and conduct safety induction program at site. It helps more that our uneducated employees knows importance about safety and hazardous area.

First aid demo at site

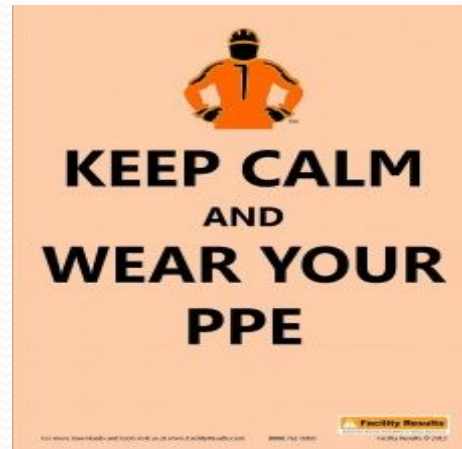

Fire extinguisher Handling training

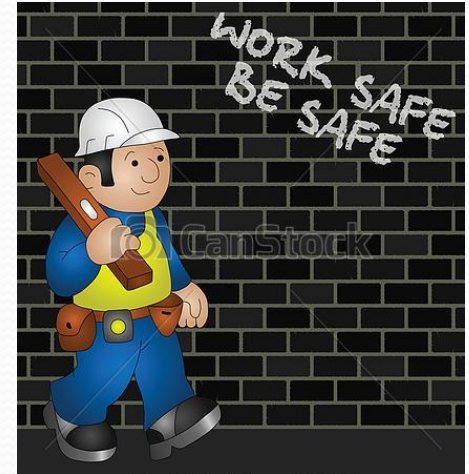

# Effects of EHS

- After following safety induction program, our personnel started differentiating hazardous and non-hazardous work/area.
- It helps them to work peacefully and can do fear free work.
- PPE usage improves them work securely.

“Employee Safety  
is  
Employer Safety”

*Our Policy “WILL TO NIL”  
committed to update and improve  
the better EHS procedures at all  
times.*

THANK YOU
